## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith et al. (US5,118,800).

Reaction scheme for example 11 shows a method for synthesizing and purifying an oligonucleotide comprising a support and using a 9-fluorenylmethoxycarbonyl as an amino protective group. The method used at least 4 pools of deoxyribonucleotide phosphoramidite monomers in solution (col. 31, line 65-col. 32 line 2). After washing and drying, the protective group (Fmoc) is released. (col. 31-34). The synthetic method is versatile and general, permitting amino groups to be selectively placed at any position on oligonucleotides of any composition or length (abstract), which is viewed to be inclusive of instant claim 5.

No claim is allowed.
